### RESTRICTION

1. Applicant's amendment filed on 9/12/01 has been entered. Claims 1-24 have been canceled. Claims 25-46 have been entered, Claims 25-46 are pending in the application.
2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 25, 27, 29, 31,32, 35, 40, 41 and 43 drawn to polypeptide, fusion protein, vaccine, therapeutic composition and a method of inducing immune response.

(Further restriction to one SEQ.ID.NO required see paragraph # 4).

Group II, claims 26, 28, 30, 33, 34, 36-38 and 39 drawn to DNA, vector and host cell and process of expressing polynucleotide.

(Further restriction to one SEQ.ID.NO required see paragraph # 4).

Group III, claims 42 and 46 drawn to an antibody and a therapeutic composition.

(Further restriction to one SEQ.ID.NO required see paragraph # 4).

Group IV, claim 44 drawn to a method for diagnosing Neisseria infection using peptide or antibody.

(Further restriction to one SEQ.ID.NO required see paragraph # 4).

Group V, claim 45 drawn to a method for inducing immune response using polynucleotide.

(Further restriction to one SEQ.ID.NO required see paragraph # 4).

3. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1645

Group I is directed to a polypeptide and a method of use. The special technical feature is the polypeptide, which is made up of amino acids. Groups II-III are drawn to structurally different products such as nucleic acids and antibodies which do not require each other for their practice and do not share the same or a corresponding technical feature. Thus these products share no common structure, no common function or property. Group I that is drawn to polypeptide is the first product and first method of use using polypeptide. The Group IV-V inventions are drawn to methods having goals, method steps and starting materials, which do not require each other for their practice and do not share the same or a corresponding technical feature as they use products that have no common structure or function or property. Note that PCT Rule 13.2 does not provide for multiple products or methods within a single application. Since the special technical feature of the Group I invention is not present in the Group II-III claims, and the special technical features of the Group II-III inventions are not present in the Group I claims, unity of invention is lacking.

#### **DISTINCT INVENTIONS**

4. For each group of inventions I-V above, restriction to one of the following SEQ.ID.NO is also required under 35 U.S.C. 121 and 372. Therefore, election is required of one of inventions I-V and one of SEQ ID NO: 1 - 10.

Inventions SEQ ID NO: 1 - SEQ ID NO: 10 are not so linked as to under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

SEQ.ID.Nos 1-10 represent polypeptides and the polynucleotides encoding them. Each sequence is unique and shares no common structure as they have specific amino or nucleic acids. Therefore, where structural identity is required, such as for hybridization or expression,

Art Unit: 1645

the different sequences have different effects and thus share no common function or property and thus lack the same or corresponding special technical feature.

Applicant is required under Restriction is required under 35 U.S.C. 121 and 372 to elect a single disclosed SEQ.ID.NO from any group elected.

5. Because these inventions are distinct for the reason given above, have acquired a separate status in the art as shown by their different classification, and while searches may overlap they are not coextensive, restriction for examination purposes as indicated is proper.

6. Applicant is required, in reply to this action, to elect a group and one sequence and identify the SEQ.ID.NO to which the claims shall be restricted. The reply must also identify the claims readable on the elected invention, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Padmavathi v Baskar whose telephone number is (703) 308-8886. The examiner can normally be reached on M-F (6:30A.M-4: 00 P.M.) First Friday off.
